UPDATE 0.71 - FISHING UPDATE! : Well guys, it has been a busy week working on the game. We've managed to get the fishing update done for this saturday. With this patch we are officially in Beta. We are still taking in submission for beta testers. What will beta testers receive?: New skins for citizens and unique structures textures and perhaps some easter eggs, who knows? If you do, its likely that the Driver Provider will be listed as Microsoft. Detailed PC Technical Fault Finding & Support Information (pt3 Laptop gfx cards) :

===== Laptop Graphics Cards ===== Some laptops have a built in Intel graphics card working alongside a more powerful dedicated Nvidia or AMD/ATI graphics card. You can select which one to use depending on how much power you want to use, e.g. If you're just doing spreadsheets you use the lower powered Intel chip. Symptoms Poor frame rate or failure to start. You should know from your laptop spec's if you have more than one card. Solution The solutions to this problem vary depending on your system and graphics card, but here are the common ways to set your system to force it to use the best graphics chip for the demo. Method one: 1. Open the control panel for your graphics card (most have an icon in your system tray, or right-click on your desktop and look for a graphics control panel option there). 2. Check under 3D settings, and make sure your best graphics chipset is set as the preferred chipset if there

is an option available. Method two: 1. Exit Steam entirely using the 'Exit' link on the 'Steam' menu (not just the close button in the top-right corner of the Steam window). 2. Right-click on the 'Steam' shortcut you use to launch Steam (on your desktop, taskbar, or start menu, depending on where you have it), and look for an option that says something like 'Run with graphics processor.' and allows you to choose which graphics chipset to use. 3. Choose your best graphics chipset. 4. Launch Steam, then launch the demo as normal.. Happy Birthday Sniper Elite: Nazi Zombie Army! : To celebrate Steam is having 75% off all Nazi Zombie Army Games! Pick up the Bundle for 4.49/\$6.25! Now is a great time to play the series if you haven't already.. UPDATE 0.59 - MORE AI IMPROVEMENTS : Well guys, today we are releasing the 0.59 Update. Focusing on fixing bugs and improving the current AI. 0.59. UPDATE 0.57.4 - BUILD AND DESTROY! (Patch) : Well guys, it has been a good working week. This update is about the structures, and how villagers and the environment interact with them. So here we go again with the improvements: Adjusted the health stat on top of the citizens Buildings will be now constructed by stages and need villager interaction, each stage taking a certain amount of time. Houses will now host villagers during the night. (Only workers, the soldiers will stay patrolling in the fields.) If your city has undeads, they might catch the roaming villagers at dusk. Else, they'll try to destroy the villagers houses and get them. Houses will be repaired in the morning, if the village has enough resources to do it. If you hover your mouse on top of each house, it will display the integrity of the building. If you upgrade your houses, they will resist better the night sieges. Patch 0.57.3 Reduced the time the zombies can survive the daytime (Will die at break of dawn, will need feedback on how that affect the very late game - 300-400 undeads) Villagers will sleep at night, not EAT! Patched the AI, to keep the task organized. Food first. Cloth second. Other task third. Patch 0.57.4 Recoded the pathfinding AI, now, villagers should not get stuck anymore. Added randomness to the job assignments. Removed the hide at night feature, until I can find a better elegant solution for it. Hope that fixed most of the reported bugs of this build. Hope you guys enjoy it.. Sniper Elite v2 Goes Free! : Sniper Elite V2 is Free on Steam for the next 24 hours (ending 5th June at 10AM PST / 6pm BST)! Download it today for nothing and own it forever, share with your friends and build the ultimate sniping team!. UPDATE: 0.44 - Larger Maps! : Well guys, here it is the update 0.44: Bug Fixed: The boats getting stuck in shore or with each other should be fixed. Bug Fixed: Chicken legs dropping way off where the chicken was butchered. Extended the line of sight of the soldiers. Added the option to confirm if you really want to save or not. Set up the help interface to have bigger fonts. Tweaked here and there the Graphical User Interface. Added larger maps: 7800 sqm. Now you can scroll the map using the arrow keys. (Working on getting this done with the mouse.) For the time being, removed the mana. Keep in mind the larger the map, the hardest it will be to villagers to get stuff done..
